Why Enterprise Imaging for Cardiology?

Single, Unified Platform

Improve the cardiologist's experience with secure web-based access to review and report cardiovascular specialty exams. With advanced image analysis tools, quick fill structured reporting templates, and collaboration functionality we provide a single workspace to enhance your workflows and efficiency to improve your patients' care experience.

Task-Driven Workflows

Organize and prioritize work with your rules-based workflows that assign the right specialists to the right studies—driving efficiency and saving time. Workflows are driven by logic instead of status, while native rules support a smooth path from order to report.

“Anytime, Anywhere” Images

Get fast and secure access to images and reports from any location, including at home, and a consistent user experience with remote reporting and shared workflows. Produce, interpret, collaborate, and make faster decisions that support quality care.

Streamlined, Structured Reporting

Support quality improvement, accreditation, and reimbursement efforts with efficient reporting. Deliver relevant, well-organized, and structured reports and referral letters with templates tailored for subspecialties including Vascular Echo, Adult/Pediatric Echocardiography, and Cardiac Nuclear Medicine.

Enhanced Collaboration

Improve communication and collaboration with peers and referring physicians with video meetings, chat and share tools, and access to images and reports. Our peer-learning workflow supports a culture of education and teamwork.

EMR Transparency

Bi-directional integration with EMR and cardiovascular information systems enable the exchange of key patient images and data, providing transparency into the patient’s medical record, even on mobile devices.

Meaningful, Actionable Data

Track performance, optimize resource allocation and improve quality with business intelligence

“Our cardiologists will have up-to-date technology that lets them see all the images they need in, effectively, a single step. They won’t

tools. Get access to relevant reports and web-based analytics that support operational goals.

have to deal with imaging data siloes anymore.”

Andretti Ervin,

Manager of Enterprise Imaging,
